

No Sense (Gimmicks and Online Instructions) by Kyle Littleton - Trick

No Sense by Kyle Littleton is a coin effect of the finest caliber. Not only is the magic strong, but it has a funny, modern presentation that highlights that some coin effects can be non-sensical.

In effect, three half dollars change, one by one, into three different objects: a Chinese coin, an old copper coin, and a button (yes, really!). But the whole is so much better than the sum-total of the parts. **No Sense** is a complete package: the technique, the plot, and the funny presentation.

Better still, **EVERYTHING YOU NEED IS INCLUDED**, including all of the gimmicks you need, a gorgeous Vanishing Inc. Chinese coin, and the protective carry case. Creator Kyle Littleton takes you through the method in extreme detail so that you can perform this stunning routine with confidence. It's the perfect fit for walkaround magic, or even as Kyle does it, in small parlor environments. If you're looking for a striking opening effect that doesn't use a table, is easy to do, and grabs the attention of your spectators, look no further than **No Sense**.
