

Gamble (Gimmick and Online Instructions) by Steve Cook & Kaymar Magic

NOW WITH NEW WALLET STYLE!

Note that **The Gamble** now comes with a new and more commercial wallet style, than shown in the video.

Gamble is a new and exclusive trick from Kaymar favorite Steve Cook - an updated version of Psycho Dice (one of our best ever selling tricks) that makes a classic effect even better! It's more practical than ever before, nicer props (that don't rattle as you walk around) and even more impressive with the addition of the extra color!

Effect

From a small faux leather wallet, you remove a prediction in the form of a colored poker chip. The spectator is not allowed to see it, but places it straight into their pocket, to keep it safe.

Then, four completely regular poker chips are shown, each a different color. They can be examined, dropped into the empty wallet, and the spectator mixes them freely...

Despite this, you control their actions, Jedi Mind Control style, and they are ALWAYS drawn to the chip that matches the one in their pocket!

Things to remember...

- Totally self working - no moves, no sleights.
- No gimmicks or gaffs.
- Self contained - Stick the wallet in your pocket and you are ready to go, anytime!
- All props supplied - everything you need is in the box, to perform right away!
- Package includes the wallet, poker chips, detailed written instructions, and video links to both performance and explanation!
