

## **Bicycle Styx Playing Cards (Brown and Bronze) by US Playing Card**

Inspired by the Greek River Styx and the Styx Death's Head Hawk Moth, comes the **Bicycle Styx Playing Cards (Brown and Bronze)**.

Conceived by Eric Ross, and custom designed by Nick Vlow - they have captured the tenuous balance between this world and the underworld.

Beautiful in its symbolism, because the designs on the thorax of the moth look curiously like skulls, these moths have been used by artists and filmmakers.

Let your magic transform -- by using these cards, your audience will be spellbound!
