

## **illuminate (Gimmicks & Online Instruction) by Bond Lee & Wenzl Magic**

Imagine producing/vanishing/transforming objects with a flash of light!  
Here's a utility device to enhance your magic effects.

Wenzl, the creator of the smallest smoke device, "Nothing", has created a fantastic apparatus again. The bright light is generated by a flash, which is identical to the light source used for photography.

- An intense light source, suitable for acts ranging from close up to stage
- Extremely small and versatile -- can be used with other devices
- Activated by pressing the gimmick or remote
- One full charge lasts for hundreds of operations
- A great alternative to flash paper

Contents:

- Gimmick
- USB wire/adaptor
- Remote
