

COKE ZAG by Richard Griffin

EFFECT

A can of Coke is placed into a box, Coke can be seen through the holes in the box the entire time. A blade is inserted through the box and the can. Top half of the box is now slid to the side slicing the can into two. Box is now pushed back, blade removed and can taken out of the box. Coke can now be opened and contents poured out to show its a real can of Coke.

- Easy to do
- Can can be examined before and after effect
- Easily adapted to Sprite, Fanta, etc
- Great for parlor shows
