

Quantum by Calen Morelli - Sharpie durch Spielkarte - Zaubertrick

A Sharpie VISUALLY melts through a playing card. You move it around and defy the laws the physics - then slowly remove it. Show the card front and back. It's solid and restored!

Quantum seriously looks like trick photography. It isn't!
Quantum is a stunning, beautiful piece of magic. It's the most visual solid through solid effect we've ever seen.

It looks incredible on video. It's even more mind-melting in person.
Quantum is the perfect combination of hyper-visuals and practicality that you've come to expect from Calen. Everything is self-contained. It requires no setup and resets instantly. Whether you're on Instagram or performing up close for a crowd, this is something that you absolutely need in your arsenal.

- Quantum comes with handmade gimmicks made with the highest precision and a streaming instructional video that features expert instruction by the creator himself (in English). Every detail and nuance is covered by Calen to make sure you can start performing this visual miracle immediately.
