

Glass Breaking Table by Sorcier Magic

Place a glass, light bulb, neon or other small glass overhang on the base of this table and at your command it will explode into a thousand pieces!

We offer a table completely revised in design, comfortable, practical and powerful. It is completely removable, consisting of three feet and a solid steel supporting rod.

Each piece is divisible from one another. A tool for the end of your show on stage. The upper base covered with fabric measures only 3.50cm thick!

It works electronically, with remote control, with four 9V batteries. It measures about 74cm in height, the upper base measures 28cm by 35cm.

Place it inside your suitcase, ready for an explosive ending! Attach video instructions.
