

PYRO Wallet V2 by Adam Wilber

What's changed? Meet the V2:

- Improved materials, now with real leather for a higher-quality feel.
- Rebuilt ignition device. Pyro Wallet fires first time, every time.
- More expensive ABS plastic shell for safe storage of flammable liquid.
- New ignition coil. Pyro Wallet V2 is thinner than before.
- Brand new high-rate battery and charging protection. You'll quit before Pyro Wallet does.

"Hi Guys, Brad Christian here, founder of Ellusionist. So. Pyro Wallet. We set our sights on creating the definitive version of a product that hasn't been on the market for almost 10 years. It needs to be, and now is. I flew to Manhattan to manage the shooting of the trailer myself. Really what that did was give me the chance to see this thing in action in real life.

I was amazed at three things:

- The thing works like clockwork.
- Size of the fire.
- How easy, how quick, the item lights.

It has to go on record as one of the easiest products to get a big reaction with. What you see in the trailer is real, people's mouths fly open. They react, and then they want to HOLD the card and LOOK at it. Exactly what you want.

Let it be known that you don't need to use business cards in this wallet. The function of the wallet is simply to light up whatever you put in it. That can be a playing card as a reveal, or a \$5 bill that you're handing to a barista for your coffee.

It's ultra fun, in addition to being good for business. If you use business cards, and you should, what a way to hand out a card! It just gets the biggest reactions because NOBODY is expecting it.

That's really all I have to say. It's a VERY simple product. One that probably everybody should own. The business cards you already have will work perfectly, as will any bill or playing card. The concept has been off the market for almost 10 years. Dirt cheap, crappy versions do exist, but the market has needed a high quality, turbo version of the wallet for a LONG time. Adam Wilber has done a

spectacular job modifying and improving this wallet for workers. Here it is, enjoy."
- Brad Christian

As an expert in wearable fire technology, creator of Pyro Wallet Adam Wilber has left no stone unturned.

The interior is composed of a USB rechargeable battery, with enough juice to squeeze out hundreds of performances.

Adam's record was giving out 200 flaming business cards at one show. Meaning that you can feel confident that Pyro Wallet is completely surefire and works like clockwork, 100% of the time.

HOW SAFE IS PYRO WALLET?

Pyro Wallet's secret is that the contents are pre-soaked with ultra flammable fluid. With only one third of the items specially-treated it allows safe handling of an item that bursts into flames and burns extremely quickly in the pre-soaked section only. One pursed-lip blow, and the flame is gone.

Every precaution has been taken to make this safe, but as Pyro Wallet ignites real fire, it **MUST** be handled responsibly. A comprehensive video download is given to guide you through everything you need to know. Thousands upon thousands of 'Fire Wallets' have been sold to Magicians all across the world with superb, safe results. Pyro Wallet is no different.

NOTE: Pyro Wallet does not ship with the lighter fluid required to ignite the contents that you put into it. However, it is widely available in **MANY** stores that sell Cigarettes and even available on Amazon if you don't already have some. You must be 18 or over to purchase and/or use the Pyro Wallet Device.

- Illusionist quality.
- Video instructions are in English.
