

Unlocked By Gustavo Sereno and Gee Magic - Sperrbildschirm App - Zaubertrick

Unlocked is a special app that makes your lock screen an ingenious and undetectable way to get information from your spectator.

Phase 1

You will be able to give your spectator the ability to unlock your phone:

- They can unlock your phone by guessing your code.
- They can unlock your phone with their fingerprint. (NEW FEATURE)
- They can unlock your phone with their face Id. (NEW FEATURE)

Phase 2

You will also be able to reveal personal information about your spectator such as birth date, special numbers, PIN codes, etc.

Phase 3

After all the reveals, you will be able to unlock any phone without questions, fishing or stooges of any kind.

You can combine the three phases as you wish or you can do each one independently.

Bonus:

We also included a way to perform Unlocked hands free without touching the phone. You can access all the information using a computer or other smart phone.

This was designed for all environments -- stage, parlor, close up, street magic or television.

How you use this is ultimately up to you.

- Easy to do

- 100% customizable
- iOS and Android

Are you ready to have this weapon in your pocket?

The minimum requirements for smart phones:

- iPhone 5 and above
- Android version 9 and above
