

## Torn Corner Machine 2.0 (TCM) by Juan Pablo - Kartenrestauration

A few years ago, Juan Pablo released Torn Card Evolution and revolutionized the way we tear a corner on a playing card.

Now, with Juan Pablo's **Torn Corner Machine 2.0**, you can make your own cards!

**TCM 2.0** allows you to make 3 different pre-cuts on a card. It also contains additional ideas, where you can use it with bills, tickets, any piece of paper... Limited by your imagination.

What if it were possible for you to tear the corner of a card, or the card in half, the same way every time?

Imagine the effects you will perform with a duplicate corner that matches every time!

One of the most powerful techniques in card magic is the "torn corner technique." A playing card is selected, one corner is torn off and kept by the spectator, then the rest of the card is destroyed. The playing card can be burnt, torn up, vanished or whatever you wish!

Then the magician draws attention to a window, and stuck on the outside of the window is a playing card - the spectator's card! It's now totally restored. All but the corner... that the spectator has been holding the whole time!

And certainly - you don't have to use a window as the final resting place.

You can have the playing card reappear ANYWHERE!

- Inside an orange or lemon
- Locked in a safe
- Inside a sealed envelope sent previously to your spectator
- Inside a block of ice
- Buried in a bottle in the back yard
- The options are endless!

The card really is torn and the spectator can even finish the rip! Easy, clean, simple and practical. The spectator selects a playing card, you tear the corner, allowing your spectator to complete the tear. The spectator holds onto the torn corner and the rest of the card is destroyed or vanished.

The **Torn Corner Machine** allows you to do so many versions of classic card magic without the limitations of sleight of hand. You can now easily perform any effect that has a selected card torn to pieces only to reappear, missing its corner that was held by your spectator. The restored card can appear in any impossible location!

There are so many effects you can do using **Torn Card Machine**!

This product will make you tear the card accurately every time!

Very easy to do.

The spectator can finish ripping the corner themselves!

**Torn Corner Machine** is a new concept in magic. Comes with everything you need to make your own cards!

You just need to supply your creativity!
