

The Moon Playing Cards by Bocopo - Pokerdeck

The Moon Playing Cards is inspired by the moon, which is the closest planet to the Earth. We used a lot of light gold to restore the beauty of the moonlight at night. And the main feature of the design is that its face cards have no suits and numbers, the artwork has been designed in a way to improve the effect of cardistry in action.

Manufactured by the USPCC with Bee stock and air-cushion finish.
