

Sharp Turn by Matthew Wright - Sharpie Zaubertrick

Magic, entertainment, and comedy -- all in one effect!

Sharp Turn is an easy-to-do, custom-designed Sharpie-style pen gimmick that allows for some eye popping visual magic. It can fit straight into any existing routine you have, or you can build a routine around the gimmick itself.

Sharp Turn allows you to have the nib of the pen jump from one end of the pen to the other. It also creates the illusion of recapping and uncapping the pen in the blink of an eye. The cap visibly jumps from one end of the pen to the other! Try as hard as you like... you just can't seem to uncap the pen... or once a card has been signed, you find it impossible to get the pen to recap.

If you are looking to add an extra moment or two of visual eye candy to your magic, then **Sharp Turn** could be exactly the right gimmick for you... at a very competitive price.

Comes complete with gimmicked pen and full online instructions.
