

Dead Lock (World Version) Large by Michael Murray - Mentaltrick

***It is recommended that those living in the United States order the US variant (see below for further information).**

What is *Dead Lock*?

Dead Lock was initially launched at the 2019 Blackpool convention and sold out immediately. Since then, demand for this product has been so high that each subsequent delivery has sold out before it has even hit the shelves thus making it the singular most successful MindFX release ever!

Using the custom manufactured **Dead Lock** gimmick you will be able to give your participant the ability to intuit the specific four digit combination that opens the padlock (supplied). Alternatively, you can use this lock to correctly intuit your participants exact date of birth, having them open the lock by entering this date as a four digit combination.

Pushing things further, an exclusive Facebook group has been created for owners of this product which houses bonus routines and additional handling suggestions that are bound to delight those who purchase this item.

Note: Access to a 35 page e-book is included with purchase.

The Three Sizes:

To satisfy demand, three lock sizes have been produced (see the secondary image on this product page for a size comparison). The specific dimensions for each size are detailed below -

- Original = 20mm x 61mm (height includes clasp)
- Medium = 28mm x 77mm (height includes clasp)
- Large = 38mm x 88mm (height includes clasp)

What is the US Variant?

When it comes to dates, we recognise that those in the US may prefer to have the participant enter the month before the day (i.e. month/day, rather than day/month format).

Due to the methodology behind this effect, we are very pleased to provide our US

customers a month/day variant that facilitates this preference.

Note: Those living outside of the US should order the standard locks.
