

UBOX by Edouard Boulanger - Trick Card Case

U Box the best card case created by Edouard Boulanger and Jeremie Josi.

During one of our meetings Jérémie presented me with a card case offering many possibilities. For my part, I had developed for several years a case with multiple functions. Two completely different but complementary principles. We decided to merge our cases to offer you the best box on the market.

The **U Box** is a real Swiss knife. With more than 7 functions, it offers you endless possibilities.

Delivered in its case and accompanied by a video support of more than 40 minutes.

Functions:

Change of sight or delay card: Change one or more cards at the time of your choice.

Appearance and disappearance: Make cards or coins or other small objects appear or disappear inside the U Box.

Card theft: With a quick and fluid gesture, steal one or more cards from the deck. This function allows you to make cards from the box or simply to replace a lull.

2 different eye cards: Perfect for mentalists. 2 clean ways to steal information. Place a playing card or written information in the U Box and read it secretly.

Loader: Load one or more cards by placing your deck of cards in the U Box. The Charger is triggered mechanically. You decide when you want to charge. You can also get rid of one or more cards with this principle.

Placement of card (s) at the beginning, middle or end of the game: After having loaded one or more cards in the U box, you have the possibility of replacing the game in the charger case the card or cards above, below or in the middle of the game.

6 visual routines: The routines that we propose to you were built, studied and tested to be carried out in professional condition.

Imitation

A playing card is chosen by the spectator and placed facing the air on the table (eg 6 of hearts), the game is then shuffled by the spectator. The magician replaces the game in its case and shakes the 6 of hearts above the case to order the 3 other cards of the same family to appear. The game comes out of the case and 3 cards are turned over. Even stronger, the cards are turned one by one to show that the backs arrived blue, even the card chosen by the spectator ...

You win

A variation of Imitation: Want to demonstrate simple and effective cheating? The spectator chooses a card and places it on the table face down, he mixes and examines the game well, you replace the game in the case. A magic pass and when you bring out the game, 4 cards are returned to different places in the game. Turn one by one these cards which constitute a royal flush, the spectator's chosen card is of course one like ...

Grab the card

A chosen and signed card is lost in the game, the magician shows the empty case to the spectator. The case is launched into the air in order to catch the soul of the chosen card. The main magicians are shown empty, he opens the case and releases the signed card ...

Sandwich

Two aces are put in the card case, a card signed and lost in the game will end up in the case ... between the two aces!

Prediction

A blue card is placed in the magician's jacket pocket (prediction), the spectator mixes and freely chooses a card which is placed in the case.

The magician places his prediction card on the table, in full view of all. The case

is opened and the spectator's card is revealed, it is exactly the magician's prediction.

Under the table

A chosen card, signed and lost in the game is then stored in its case. The spectator indicates a point on the table. The magician places the case on this precise point. With your fingertips the case is crushed on the table! The left hand pulls out the cards that have just crossed the table. The game is placed on the table, the magician reconstructs the case and shows that there are no more cards. The case is passed over the game as if to absorb a card, the magician opens the case and leaves the signed card of the spectator...
