

Minimize by Chiam Yu Sheng - Torn and Restored

If you are looking for a powerful and visual effect, MINIMIZE is made for you. Imagine a signed playing card with a torn corner that vanishes with no special move. Then you introduce a few corners with different colors/sizes from previous performances and take one with the wrong color/size.

Just shake the corner and it visually changes into the matching signed card corner! You can now give the card and the corner for examination.

- MINIMIZE has been designed to be easy to perform. All the moves are justified in this routine.
- You will receive everything you need to perform the effect : the gimmick, different colored torn corners, locking system.
- Created by Chiam Yu Sheng from Singapour.
- The video instructions are supplied through a practical download link. They are in English, but easily understandable by anybody thanks to the clear video.
