

GRAVITY REEL HOLDER by Joao Miranda

This holder was specifically designed to hold the Gravity ITR inside your jacket pocket or to your belt.

It allows the Gravity ITR to be placed **horizontally OR vertically**, depending on your specific needs (if you need the IT to be pointed **upwards** or **towards** the audience).

It is made in injected ABS (Acrylonitrile Butadiene Styrene), providing the performer with a top-quality holder that last a lifetime.

(Instructions are in your original Gravity Reel instructional page)
