

The Chameleon Card 2 by Dominique Duvivier - Pokerdeck

A must from Dominique Duvivier!

When magic surpasses even the magician!

Did you know that the latest fashionable accessory for magicians is the chameleon? No? Yet this is what you are going to explain to your audience with this crazy trick.

The advantage of the chameleon is its ability to blend in with its environment. Starting from there, your chameleon card will make your deck of cards undergo surprising changes: cards will duplicate themselves, chameleons will invade your deck, they will even succeed in imitating the image of your fingers on the cards, and the case will not be spared!

A complete act of more than six minutes, technically very affordable, which will allow you to take your spectators into a grand finale... because it will be very difficult to make it louder!

Strengths:

- Easy to do
- Very striking original trick
- 15 cascading magic effects
- Video instructions (including the patter)
- Bicycle cards specially printed by The United States Playing Card Company

"One of the routines that made me dream the most (...) the impact on the audience is extraordinary (...) and it works on its own!"

- **David Stone**
