

PCTC Productions Presents **ABRA** by Jordan Victoria

Every time you have a party, every time you have a drink with friends, you have someone asking for a trick since your super friend sells you as "the craziest magician you've ever seen..."

Now with **ABRA**, you will be able to perform a super quick and visual effect anytime, anywhere that only takes up a small place inside of your wallet.

The plot is simple: take out two folded cards from your wallet - one red and one blue -- and perform the most visual and easy transposition inside of your spectator's hands.

What's new here?

Well, **ABRA** is 100% clean from beginning to end and you can give everything out for examination without any switch.

The cleverly-made gimmick allows you to get a blue to red change OR a red to blue change. No need to select!

Almost no angle restrictions. You can show both sides of the folded card -- the color changes in a blink of an eye.

So don't wait anymore. Grab your **ABRA** to get a pocket miracle that will blow your audience's mind !
