In 2018, Mike brought you Revise 5; a revolutionary multi-phased color changing gum effect. It was an instant sell out and it hit the magic community by storm.

Back then, each Revise 5 gimmick was individually crafted to perfection by the creator. But that also meant that it was hard to sustain its availability in the long run. After years of hard work at Skymember Presents, we are proud to announce that we have successfully developed a new construction management framework for mass production. Enter "**Revise 5 Mark II.**"

We have redesigned the gimmick from the ground up and manufactured it using a brand-new material. This enhancement allows you to perform Revise 5 confidently and reliably. Don't worry, you can still perform the effect exactly as before. But you now have the option to end the effect in your spectator hands instead. It's effortless, practical and super visual.

If you weren't able to hop on it the first time, you won't want to miss it again.
