

## Eye Candy by Felix Bodden and Illusion Series - Zaubertrick

Felix Bodden is well known for being one of the most talented instagrammer in the magic industry. His videos have become viral on many occasions, blowing not only lay people's minds but also magician's one.

Today, Felix Bodden brings us the opportunity to learn three of his most viral videos, giving us the chance to become viral in our instagram feed. Welcome to **Eye Candy**.

**Eye Candy** is not only an instructional video, it is a weapon to develop our creativity and get access to become the next viral magician on social media. We will be learning three amazing effects specially thought for social media:

- **Vanishing card:** make vanish the whole card in the most visual way you can imagine only leaving the frame of the card.
- **Morph:** introduce a sponge ball and show your both hands empties. With the blink of an eye transform that sponge ball into a full deck of cards with cards inside. The best part? The box can be shown by all sides without giving a clue of where the sponge ball is!
- **4 king production:** Produce the four kings from the deck in the most amazing way you have ever seen. You will not even be touching the deck while they will emerge from the inside!

With the purchasing of this project you will receive a tutorial where Felix Bodden teaches you, with the help of Julio Montoro, how to construct all the gimmicks using the materials you will receive and some other things you will have at home. The construction of the gimmicks will not take you more than 10 minutes each.

Welcome to the newest project from the instagrammer magician Felix Bodden. Welcome to **Eye Candy**.
