

FADECK BLUE by Juan Pablo - Verschwindendes Deck - Kartenvorhersage

Imagine this: a spectator chooses a card and you keep it clearly in a pocket and the rest of the deck remains in one of your hands, now slowly, visually and magically the deck disappears until there is only one card left in your hand and it turns out to be... the chosen card and the rest of the deck is now... in your pocket!.

FADECK is super visual, the deck disappears very slowly, and you reset it in five seconds.

Excellent for close up magic and stage magic.

Inspired by an idea of the excellent magician Paul Harris Juan Pablo has created a version with a different concept.

The explanatory video includes three very powerful routines and a zoom version that is incredible.

FADECK comes in two versions: Red Back Bicycle deck and Blue Back Bicycle deck.
