

Dropped Call by Kyle Purnell & Zach Evans - Smartphone Verschwindetrick

Vanish your phone in the cleanest way possible - with no sleeves, switches or cover.

Dropped Call is a full utility with endless possibilities.

- Completely universal.
- No switches.
- Ends clean and examinable.

With the Dropped Call gimmick you can make your phone vanish, transpose and appear with no switches or cover.

Because the self-contained gimmick requires no switches it doesn't matter what your real phone is... It works on its own and is specifically-styled to match an iPhone X's aesthetic.

As easy as 1,2,3...

The creators, Kyle & Zach, have designed the Dropped Call gimmick to be performed with one hand, so even a beginner with no prior experience could perform this effect.

- Illusionist quality.
