

## **SKY FALL by Sebastien Calbry - Rot**

A card folded 4 ways instantly unfolds itself!

It's the latest challenge taken up by the creator Sebastien Calbry.

After having a card selected by a spectator, you turn over the card case and draw the attention on to the folded card on top of it. You explain that this is your prediction!

Now all you have to do is grab the folded card and throw it into the air. The card is going to automatically and instantly unfold into the spectator's chosen card.

An ingeniously designed mechanism which is surprising in its simplicity and that allows magician what ever his/her level and skill set to perform this effect.

The real asset of this gimmick will be the reactions that you'll get from your audience. The spectators will be convinced that you're simply going to unfold that card.

They will be stoned by these 2 effects, the revelation and transformation of their chosen card.
