

Switch One by Christian Grace - Vorhersagetrick

A folded card, that has been trapped under an inverted clear wine glass in full view, is shown to be a card named by a spectator.

For many, this is the holy grail of card magic. To achieve it in a manner as fair as this, where the spectator names the color, suit and value of a card, has been extremely difficult, if not borderline impossible... until now.

Christian Grace (the innovative mind behind "Level One") and Vanishing Inc. have partnered to present "**Switch One**", an ingenious new system that allows you to perform a variety of magic and mentalism miracles. The word "system" is a key part of that last sentence. To simply call this a "card trick" would be a huge disservice to the variety of principles that come together to create this powerful offering.

At the core of "**Switch One**", there is a special gimmick that truly allows you to retrieve any card. However, if you want to opt for the easier handling (as shown in the trailer), you'll find that a singular (yes, just *one*) moment of equivoque in the beginning helps create the best results. As you'll learn both though, you can decide for yourself!

You'll also learn Christian's truly amazing switch where objects invisibly melt into one another. This imperceptible switch allows you to switch a card right under the noses of your spectators. They can be burning your hands and won't suspect a thing.

Despite how impossible it might look, **Switch One** is actually super easy to use. With a little practice, anyone can master it and will then truly have a miracle-maker on their hands.

This special "**Switch One**" system works with any deck of cards but also isn't limited to just playing cards. You can also use it to switch bills or billets to predict star signs, drinks names or whatever you'd like.

Check out the trailer for a full unedited performance.
