

E WAVE (Gimmick and Online instructions) by Marc Oberon

Grant the power of Extra Sensory Perception to anyone.

Starts with a super clean 50/50 'which hand' style effect and builds progressively towards a staggering climax.

This combination of methods allows the spectator to correctly guess the position of any symbol.

No procedure, nor mental gymnastics, no memorization needed - This is direct, effective mentalism.

Innocent looking precision made props made in high quality materials.

Any symbol, any position.

"I have had the opportunity to see Marc Oberon's E-wave, and I can tell you that the E stands for Excellent."

- **Max Maven**

"Marc's new piece challenged all my previous notions about ESP routines. It is dramatic and exciting in a way that is rarely seen. It starts simple and then just builds and builds. Remarkable."

- **Tom Stone**

"I love being fooled, and Marc Oberon's wonderful E-Wave, a multi-phase gem of increasing impossibility, did that handily! This very clever combination of methods feels like a classic."

- **David Regal**

"I like it so much I've demanded I get the first one!"

- **John Archer**

"This really fooled me! Such a strong and direct routine, I'll perform this in both my zoom, parlour and stage shows!"

- **Lior Manor**

"It is just great! Marc fooled me not only once but multiple times. The best is that it is so versatile. You can use it for many different presentations. Highly recommended!"

- Lars-Peter Loeld

"A deceptive, clean idea that enriches a classic in magic!"

- Nikola Arkane

"At last I've found the perfect effect to feature in my speaking engagements!"

- Romany
