

SWITCH by Manoj Kaushal - Kartenverwandlung

Switch a random card to your spectator's signed card, vanish a card, transform a card to another object. These are just few things that you can do with **SWITCH** envelope.

BUT what really makes **SWITCH** stand out is its ability to let spectator take the card out from the envelope and also, look inside it.

No more forcing your audience to watch from distance and never letting them hold the envelope.

It's time to ENCOURAGE your audience to

- Hold the envelope
- Remove the content of the envelope and
- Take a peek inside the envelope as the magic happens in their hands.

Envelopes are no more just an eye candy-social media trick. This utility device just became PRACTICAL!

- No magnets
- No flaps
- No elastics
- Resets immediately

It's time to **SWITCH** your existing envelope.
