

B_Clear - BIC Feuerzeug - Zaubertrick

Axel VERGNAUD and Alexis Touchard are proud to introduce B_Clear! This device will allow you to transform a BIC® lighter into a completely transparent lighter! This tool, coupled with the gimmick provided, is a gold mine for creative magicians. You will be able to find a torn card corner locked inside the lighter, or even small candies to perform a close-up routine for children, and why not a wedding ring?

Made in France, the transparent lighter will be the starting (or ending) point of your magic effects. The extra gimmick provided can be used with normal BIC® lighters for transposition effects or ultra flash color changes. Original, modern and up to date, B_Clear will find a place of choice in your close-up repertoire. Even better, if you're doing Instagram or Tik Tok videos, this fast, visual and flashy effect will fit perfectly.

You can also create a complete lighter routine by using B_CLEAR with ETNA from the same creator.

Highlights:

- Transparent lighter and gimmick included.
- Easy to perform.
- Visual & Modern.
- Several possible routines (color change or impossible location).
- Very quick reset.

"Visual. Practical. Tons of possibilities. A great prop to carry in your pocket." - John Guastaferro

"This is an amazing application with so many uses for the everyday carry. I love it!" - Richard Sanders
