

Dream Table - Zaubertisch

After 2 years perfecting this new idea, Gee Magic is finally proud to announce “Dream Table”. With this, you will be able to switch an object automatically, without touching it. You can switch objects such as decks of cards, signed bills and cards, Rubik’s cubes or anything that you want, which makes this prop a table with endless possibilities only limited by your imagination.

A small and custom-made remote is included to control everything. After you press the button the switch will begin. It will give you feedbacks of the switching process so that you can have control of everything during the process (the switch is made in 3 seconds).

If you want, you can do a simple switch and have instant access to the spectator’s object through the back part of the table.

You are not limited to use it only once in a show or take the table off the stage, to perform different routines. There is a plate that you can attach to the back part of the table, so that you can load it with different objects and perform different routines. This system will allow you to make as many switches as you want to. The pattern of the towel makes the switching square invisible to the audience, and makes “Dream Table” look like a regular stage side table. Everything disassembles and fits inside of a custom-made flight case.

Besides your needs and imagination have been included 10 different routines that you can instantly add to your show:

- Memorized Deck.
- 4 Card predictions.
- Triumph.
- Rubik’s Cube match.
- Unlock the Ring.
- Bill to lemon.
- Signed bill to impossible location.
- Book Test.
- And much more...

Have an entire show with this and you will be aware that Dream Table is in fact the table of your dreams.

MATERIAL INCLUDED:

- Dream Table;
- Tripod;
- Black Cloth (without stripes);
- 2 Coasters;
- 1 Battery;
- 1 Charger;
- Remote Control;
