*"Cognito is genius. What an incredible tool with limitless possibilities. 11/10"*

- **Christian Grace**

Magicians and mentalists have strived for centuries to crack the code of real mind reading.

**COGNITO** is the closest you will ever come to experiencing the incredible power of telepathy.

Imagine having someone think of ANYTHING (a playing card, star sign, word, movie, celebrity...whatever THEY want). They NEVER write it down, type it, point at it, click it, blink or even whisper...**the thought ONLY exists inside their mind.**

**Yet with Cognito you know EXACTLY what they are thinking. There is even a way to do it with no peek at all.**

**Cognito** is a revolutionary Magic App that combines a classic principle with genius new methods to *know* what spectators are thinking without seemingly doing anything.

The reason reviewers are calling this *"The best app of the decade."* is because it has no competition. **Cognito** stands on its own as the most unique and brilliantly thought out Magic App ever created.
