

Neomagnetic Ring (19mm) by Leo Smetsers

Imagine a Neo Magnetic ring made from stainless steel and polished by hand. The Neo Ring is not brittle like many that are currently on the market and will not smash, crack or break. The best thing about the Neo Ring is you are in complete control of activating and deactivating the field. So now you can perform routines with the knowledge you are not going to get stuck to anything unexpectedly. Yet when you're ready, you'll be like a real life magneto.
