New effects descriptions:

- Classic sign card to wallet. A spectator signs a card and you can perform your favorite card routine. For the big finish, the sign card appears inside the coin compartment of your "**Lynx wallet 2.0**" in the most impossible conditions.
- Imagine showing a wallet containing one envelope with only one black envelope inside and the magician can let the spectators to exam the hole compartment.
The magician asks the spectator to think of one city that they would like to visit and you will be able to produce the freely chosen city. Predict a chosen city without stooges or pre-show work.
You will be able to do the same thing with the 52 playing cards.
- A nice way to give your business cards is if they can become magical. You ask your spectator to sign one of your business cards and then you write number that will be your prediction. You finally place it inside the wallet. A number is chosen and you show that your prediction is wrong. You close the wallet again, and when you open again, the number

changed to the right one and you can give the sign card as a souvenir.

Other ideas are included like a stickman holding a card, which changes into the chosen card.
