

## Soundboards Midnight Edition by Riffle Shuffle - Pokerdeck

**Soundboard Playing Cards** were first produced by Patrick Varnavas in 2014 and then released in 2015. With the first edition printed blue and the second edition printed red, we are now introducing the newest edition - The **Soundboard Midnight Edition**.

The **Soundboard** deck was created to celebrate vintage audio gear like 80s cassette players and gramophones. This time with the Midnight Edition, we are bringing in a sleeker look combining major elements from different audio equipment that creates a harmonious setup. The design is detailed and easy on the eyes, finding a balance between simplicity and complexity. Illustrated by Stuart Palm, the back design embraces the modern style with touches from the classics.

The **Soundboard Midnight Edition** will be printed by USPCC with Silver Metallic Ink on their Bee Crushed Stock.

Limited to 2500 Decks.

Every detail from the original Soundboard's tuck case has been kept with its functionality and has a nostalgic vintage mixtape feel. With the newest edition of **Soundboard**, anyone who loves music will surely resonate with this deck.
