

Fire Book by Tora Magic - Feuerbuch

Produced and Designed by Tora Magic Company

An astonishing item! Can be used both in grim or funny programs. Open an ordinary text book, while reading a certain page, suddenly, the book is on fire with huge flames on end. The trick can be done repeatedly. Close the book to put it out. You may claim that the fire is due to the fact that the writing on the page is very hot or is from inferno or even is about hell!
