

SUPER LEVITATION WITH 360 ROTATION by Tora Magic - Zuschauer schweben lassen - Zaubertrick

A beautiful and mystifying levitation effect!

The assistant climbs on a board that is resting on two screens, and lies down flat as she is placed into a trance. The magician stands behind the board and the screens are then removed, causing the assistant to float in mid air! The magician concentrates on the assistant and she slowly starts to float around the magician's body. She is brought back into position, the screens are replaced, and she is removed from the trance to conclude the effect.

This product is capable of rotating 360 degrees while it is floating in the air.
