

LUX by Lloyd Barnes - Zaubertrick

"This is the greatest trick of the last decade. It's probably the greatest trick of all time."

- Craig Petty

The most powerful EDC weapon ever created. This is **LUX**.

LUX gives you or your spectators the ability to harness the true power of ultra violet light.

This is one of thousands of effects possible with **LUX**:

The spectator is handed a UV Pen and the special **LUX** device. They draw a UV 'X' anywhere on themselves. They shine the UV light on the 'X'... in ultra slow motion, in their hands and on their skin, that 'X' visually vanishes. Like the Avengers' Thanos 'Snap!', it literally melts away into the ether.

Next with the light still in their hands, they shine the it on your arm (or anywhere you want) and the 'X' that they just drew visually emerges back into existence on your skin!

This is the closest magic has ever gotten to making CGI from the movie screen and into real life and entirely in the hands of the audience.

"LUX is such a powerful experience! It looks how real magic should look!"

- Tobias Dostal

But that's just one example. You can choose **LUX** to do the most stunningly visual magic that you will ever witness or you can use it to elevate your mentalism to jaw dropping new heights.

From the cleanest Invisible Deck ever created, to undeniably fair Lottery predictions. From Book tests, to Bank Nights and everything in between. The dynamic power of **LUX** is truly unparalleled.

"Lloyd has done it again!! Visually stunning, crazy fooling and stupid easy to perform!! This is something special!!"

- Adam Wilber

You can perform **LUX** with everything you need right out of the box. **LUX** comes with:

- Precision made intelligent **LUX** Device
- Custom UV Pen with specific ink that does not irritate skin.
- 4x Batteries included in the unit itself. Enough to last 6 months worth of performances.
- Steam or downloadable in-depth instructional video from Lloyd Barnes himself and expert instructor Javier Fuenmayor, teaching you how to use **LUX**, tons of routines, additional ideas and special tips and tricks.

"LUX is by far, the closest thing to real magic I've ever seen or experienced."

- Ben Williams

The craziest thing about **LUX** that we still can't quite wrap our heads around is... this is possibly one of the easiest to perform pieces of magic that's ever been devised. So easy in fact, that spectators perform effects entirely on themselves, from start to finish. Allowing you to truly hone in and focus on your performance.

When you pick up **LUX**, you're not just getting another magic trick that's getting buried into a draw. You're owning a covert James Bond-esque powerful and practical weapon that will live seamlessly on your keychain until the moment you need it.

Harness the energy of light. Capture the power of **LUX**.

"LUX is a powerful EDC that looks and feels like real magic."

- Rory Adams

"Lux is beautiful. It will leave an impact on everyone who sees it."

- Elliot Gerrard

"It is a truly rare occasion that magic sees innovation. And this is one of those occasions."

- Mijrin Al Hajri
