

Boarding Pass by Mariano Goni - Flugticket Vorhersage - Zaubertrick

Mariano Goni has done it again!

A true worker both for mentalists and magicians.

This is one of the highest rated tricks we've ever offered. Straightforward, using these days common stuff: QR codes and mobile phones.

HERE'S WHAT HAPPENS..

1. Three different boarding passes are introduced. Each one, the audience is told, goes to a different city.
2. A spectator names ANY city in the world. Yes, no restrictions, no limitations.
3. They select ANY one of the tickets to fly to his chosen city.
4. The other two tickets, when scanned go to different cities... but the chosen one opens the exact google maps location of the spectator!

You never touch the spectator's phone, and the boarding passes are in plain sight and examinable.

And it's easy. How easy? Even your spectator can do it.
