

Hot Book - Brennendes Buch - Fire book by Premium Magic - Feuerbuch

Fire Book is a modern sensational trick in the field of pyrotechnic magic. It goes very well as an opening "Quickie" for any stage show.

Effect: The performer enters the stage holding a hard bound book. He tells the audience before coming here he was reading this book having scientific articles on global warming. The book tells of the dangers mankind will face. He leafs through the book, letting the audience know the pages are full of text. He continues to say that due to the rise of the temperature on the earth, fire is breaking out in many dense forests all over the world. So if we do not take steps towards lowering the planets temperature, the fire may flare up here, there, everywhere - as the performer comments, the books pages suddenly burst into flames! Immediately closing the book and extinguishing the flames, he tells the audience it's quite a hot topic!

Note: No lighter included.
