

Invisible Trip (Schwarz) by Tumi Magic - Gegenstand in Feuerzeughülle erscheinen lassen

An incredible piece of handmade leather that you can carry with you at all times. You could disappear the inside device of the lighter and its place will appear the signed card of the spectator.

You can use bill, notes and everything you can imagine. You only have to consider the same size of the gimmick to put it inside the lighter.

We are passionate about switch effects. In the past we created Froggy, our first project with Tumi Magic of switches. Now inspired by different classics of this kind, we found the way to make it possible and introduce you: **Invisible Trip**.

You could use a lighter to appear card packs with flash paper, coins or use it for whatever routine you have and then the magic will happen when you use this piece.

Includes gimmick, additional items to perform and online instruction.
