

SHOWCASE (Universal) by Thomas Sealey - Smartphone Zaubertrick

SHOWCASE - UNIVERSAL EDITION

The Universal version (66mm wide x 95mm high) sticks to the back of your existing phone case and can be removed if required.

Created by Thomas Sealey

Designed & Developed by Mark Traversoni and iNFIniTl

In SHOWCASE we are unanimous. It is that good it has instantly become a part of ALL our professional sets at Saturn Magic.

"If you don't do card in phone there are no excuses now."

- Mark Traversoni

"The dawn of a new age in card or coin to phone."

- Kieron Johnson

"This Thing Is PHONE-OMENAL."

- iNFIniTl

"Card in Phone REVOLUTIONISED!"

- Lord Harri

SHOWCASE blurs the line between physical, digital and magical, taking the modern classic 'Card To Phone' effect into a new dimension. Never before have you been able to show your hands completely empty or show the phone all around before sliding, swiping or visually dropping their full card - yes, FULL CARD onto their hands.

The days of tricky sleights, mercury folding cards and holding out things behind the phone are over.

SHOWCASE gifts you a universe of new ideas and absolute freedom over handlings, allowing us to do things never before possible... never before this clean or visual... COMPLETELY SURROUNDED. It's one of those effects which looks and feels like real magic - the moment you produce the card feels even to the

performer that it came from inside the phone. **So... what is SHOWCASE?**

SHOWCASE is a bespoke phone case designed and developed by Thomas Sealey and the Saturn Magic Creative Team. It gives any compatible phone superpowers.

It allows you to secretly hold out a single (or even multiple playing cards)

Load and lock selected and signed cards during performance

An ingenious locking mechanism means the moment you produce the card is 100 percent under your control

Allows you to vanish a playing card and turn it from physical into Digital.

A product which works gloriously with the existing Card To Phone apps (purchase separately) on the market (including Card to Phone and Card Now) which you probably already own - if not we highly recommend them - and they're cheap too. You can of course, perform card in phone using other non-app methods which we teach you using your phone's camera roll or video.

The doors SHOWCASE open make way for some truly incredible and original routines including

NEW Video Prediction

Picture this, after your spectator picking a card, pulling your phone out, going into your photos album to play a video of yourself you recorded earlier that day. In the video, you show the back of a predicted card before DROPPING it, off the screen - and out of the phone, into your hand!

Inside the Box:

- Showcase Universal
- Card to phone slide

PLEASE NOTE that this UNIVERSAL VERSION CANNOT produce coins as shown in the trailer (Full Case Version Only)

This is Card in Phone like you never thought possible.

IT'S SHOWTIME.
