

## That f\*cking card by JOTA - Kartentrick ohne Karten

*"The first card effect that doesn't need cards. You only use a regular box and an incredible prediction".*

*"52 free possibilities, a single prediction and an unforgettable souvenir".*

Imagine taking out your deck and placing it on the table.

Then you ask a spectator to think of ANY OF THE 52 CARDS.

With completely clean hands you show a paper inside the cellophane of the box with a written prediction of the chosen card.

But there is more.

You take the paper and add the date and your signature after the message and you give it to him as a souvenir of the unexplained experience.

- Spectator can freely choose any of the 52 cards!
- No nail writer needed
- You use your own bicycle deck
- You are free to perform whatever trick you want with the cards before or after this one.
- Instead of a piece of paper you can use your business card to leave it as a souvenir with your information.
- Ideal to always carry around and even to do it remotely in virtual shows.
- Easy to do

With the online tutorial you will discover how easy is to perform it and you will learn different options to present it, even for close up or virtual shows.

Model: Red Bicycle deck
