

Brainwave Deck Bicycle - Supreme Line - Rot - Zaubertrick

Here is an Brainwave deck for true professionals! In fact with the Supreme Line, the cards will look more natural, compared to traditional Brainwave Decks.

A spectator thinks freely of a card and names it. Incredibly it will be the only face up card in the performer's deck. But that's not all, as the thought of card will also be the only one with a differently colored back!

This is an improved version in many respects compared to the traditional Brainwave deck, in fact:

1. Thanks to the use of the Bicycle Supreme Line cards that are slightly thinner than the normal Bicycles, it was possible to form a deck of 56 cards instead of the 52 used in traditional decks, making the deck look more natural. Spreading the cards in your hands or in a ribbon on the table, in traditional decks Brainwave decks only 26 cards are visible while in this one you will see 30, and this contributes to making the deck look normal.
2. If the spectators choose a card that is on top or on the bottom of the deck, with this version their card will never be the first or the last. but will be found in a more "natural" position, that is, third from the top or bottom.
3. Any card chosen by the spectators can be taken out from a case of the correct color (the case can be both blue and red!).
4. The deck holder called "Deck Protector Pro" used in the video is not included and can be purchased separately. While not necessary (you can use a simple envelope, or even keep the deck simply in your pocket), it is a perfect companion for the Brainwave Supreme Line. In fact, from the holder, in the simple opening action, you can take out a red case (with red cards inside), or a blue case (with blue cards inside).
