

Keymaster Chrome by Craig Petty - Zaubertrick mit Schlüssel

A WOW Eye-Popper, with magic happening in the spectator's own hand - super powerful!

As used by DYNAMO on his hit TV show, *Magician Impossible*.

KEYMASTER is an incredibly organic close-up routine with multiple moments of magic happening right in the spectator's own hands. It takes the moving hole plot to new heights as the impossible happens right before the spectator's eyes.

Comes with precision-made custom keys that make this effect easy to perform. The new **KEYMASTER** keys are now profiled to look like cut keys. They are slightly shorter in length, making them easier to handle, and now they are finished in beautiful polished **CHROME**.

The Effect

1. Two keys are shown to the spectator
2. Spectator holds onto one of the keys
3. The hole in your key is visibly removed. 1st W.T.F. moment!
4. Spectator discovers two holes in their key. 2nd W.T.F. moment!
5. Spectator now holds onto your blank key (with no holes in it), and you hold onto the double-hole key.
6. You visibly remove one of the holes from your key. 3rd W.T.F. moment!
7. Spectator finds a hole in the shaft of their key. 4th W.T.F. moment!
8. Everything can be examined! W.T.F.
9. Precision-made keys and an instructional download supplied.

"W.T.F. When is that out? I need this!"

- Alan Rorrison

"A great solution to the moving hole plot. Brilliant!!"

- Tom Elderfield

"This looks brilliant and the final phase was totally unexpected. Two strong moments of magic that happen right in the hands of the spectator!"

- Marc Oberon

"That is definitely a worker!"

- Brendan Rodrigues

"Wow I need that now!"

- Julius Dein
