

Pieces By Adrian Martinus & Agus Tjiu

'EFFECT:

3 celebrity photos each cut into 4 parts: forehead, eyes, nose and mouth. So there are 3 sets of foreheads, 3 sets of eyes, 3 sets of noses, and 3 sets of mouths. The spectator then randomly chooses a part of the face from each set. There is less than a 2 percent chance that it will be a correct set. The result, of course a messy-mixed set that looks funny. But what they don't know, that the messed up face have a secret image behind it, which compose a whole new complete face, whilst the rest of the unselected parts are blank on the back.
