

## **Black Art Filter by Lemo Magic - Licht der Kameralinse manipulieren**

The **Black Art Filter** is a magic accessory to be placed on the lens of the cameras in different devices.

It will help you regulate the different types of lights, making it easier for you to hide the different fakes you use.

In addition, being antireflex, it will enhance colors and images. This way, you won't have to deal with glare and reflections that hinder your work.

This plastic device has three interchangeable filters of different graduations. It is adaptable to notebook, cell phones, netbook and Tablet, both for front and rear cameras.

The product is intended to be used in live shows (ZOOM, MEET, etc.) or recordings (Tik Tok, YouTube, etc.)
