

## **PORTAL by Peter Eggink - Loch in Karte - Zaubertrick**

We all are familiar with the "Acme Black Hole" featured in cartoon classics - "**Portal**" is a close-up illusion that mimics this effect on a playing card. A clever, new gimmick & handling makes this one a real fooler and yet VERY easy to do.

A card is selected and a black circular sticker is stuck on back of the card, explaining that this is in fact a "portal" to another dimension...all of a sudden the black dot becomes a REAL hole, right through the card. The real hole is then magically slid off the card, showing it is just a black circular sticker, leaving the card back to its original condition again.

"**Portal**" works great live and perfect for social media platforms, Tik Tok, Instagram, Zoom etc.

Comes with ready to go, hand-build Portal gimmick, 2 black circular stickers and online instructions.

*\*Note: This effect involves "black art". A black background/shirt is required.*
