

Cubio Brass - Stoppwürfel - Würfel auf Schnur mit Mechanismus

This is a nice little trick to amuse your friends. The effect is similar to our *Obedient Cube Effect*, but the working of it is far superior.

You show a small brass cube threaded on a string, and when you hold the string in your hand and stretch it out vertically the cube slides down.

If you reverse your hands it will go the other way...

Magically you can make the cube move up and down, stop it in place, and control the speed all at your command.
