

SPIX by Les French Twins & Magie-Factory - iPhone Zaubertrick

SPIX is the result of the collaboration between Magie-Factory and the French Twins.

Discover through this application 2 devastating effects, usable in combination or independently. Commercial effects designed for workers: **AIRCODE** and **AIRPRINT**!

Through 45 min of explanatory video full of ideas, subtleties and routines, discover:

AIRCODE:

Without touching anything, the numbers on the lock screen dig in one by one, unlocking the phone, and from distance! AIRCODE is a 100% customizable tool.

An example of a routine: Imagine explaining to the spectator that you feel like you have something in common, in this case your phone passcode. Ask him to think of his iPhone passcode and look at your phone. Without touching anything, the numbers on the lock screen dig in one by one, unlocking the phone, and from distance!

A mentalism effect imbued with digital magic that will be remembered! Many presentations are possible to match your style and leave your viewers speechless.

AIRPRINT:

Imagine asking the spectator to think of any object and any color.

Millions of choices and combinations are possible! Without any suspicious gesture, finish your routine by explaining that you came beforehand with a small souvenir for your spectator. He then discovers the photo of his unusual object, in the color corresponding to his choice. A purely extraordinary effect that leaves a physical* and impossible memory for your audience.

If you do not want to print the photo, **AIRPRINT** allows it to appear in your photo

gallery on a desired date.

AIRCODE and **AIRPRINT** are fully customizable according to your needs and can be carried out with or without an internet network, ensuring the success of your routine.

You can use them in combination like the French Twins or independently depending on the duration of your routine and the desired emotion.

The application is designed for workers, as intuitive as possible, easy to use and reassuring.

Discover the power of **SPIX** now!

Features:

- All effects fully customizable (triggering mode, delays...)
- Possibility to connect a universal Bluetooth remote control.
- Instant reset
- Detailed explanation video (French/English) (many subtleties and ideas)
