

## **MVP by Gonzalo Albiñana and Crazy Jokers - Mehrfachvorhersage von Kartenreihen**

*"Gonzalo has modernized and streamlined a much loved classic. Following in the path of Max Maven and adding his own touches to revive this often overlooked piece of mentalism that allows for great customization and endless presentational possibilities. Recommended!"*

**- Luke Jermay**

As a prediction, or miraculous intuition, you place a series of cards in order. One or more spectators choose the order in which to place another twin set. Impossible as it may seem, the two columns always match.

For the first time ever, you can carry your ESP board in your shirt pocket. Without any complicated sleight of hand or strange handling, you will have one of the most powerful and magical coincidences and multiple predictions in mentalism. With new methods, handling, ideas and possibilities, **M.V.P.** by Gonzalo Albiñana has given a new life to one of the most powerful classics of mental magic. In addition, its format is practical, 100% portable (you can have it in your pocket), a perfect professional solution for any situation, whether close-up magic, parlor, stage, children's magic, comedy... You can adapt and change the cards at any time and in a very simple way.

You can use business cards, letters, photos, papers,... predict company logos, fruits, sports, flags, names, words, numbers, ESP symbols, characters...anything you can think of. You can customize it by drawing or writing by hand, or printing directly from the computer.

There are alternatives of new types of finals, with apparent faults, explanations of different methods using M.V.P., ideas to build one in giant size...and material is included so you can start preparing your sets yourself.

**M.V.P.** can be examined, before and after. You can finish everything "clean".

You can exchange options, messages, orders.

Material included.

New routines explained, new ideas and endings with which you will even fool
