VOX is a potent utility that allows you to perform an insanely clean, completely hands off *Any Card At Any Number* with just a deck of cards and your iPhone!

The Effect:

Prove that Siri is an amazing mentalist. Have a participant freely cut the deck as many times as they like. While they are mixing the pack, the performer asks Siri to name a random card and a random number. Without ever touching the cards, and from a position they freely cut to, they count down to the number and the card is there!

Key Points:

- Uses the real Siri and native features of the iPhone. No magic apps or screen recordings
- 100% hands off - the performer never touches the cards!
- The participant can even name, or freely select, ANY card instead of asking Siri
- No forces - No reset
- Instantly repeatable with a different card and number with the deck still in their hands
- They can freely cut the deck wherever they like - even after the card has been selected
- No table required - it can be performed entirely in the hands
- Multiple variations and methods are taught with handlings for close-up and stage
- Works offline (no need for an internet connection)
- The initial one-time setup is super easy and takes only a few minutes to complete

With **VOX**, you will receive everything you need to start performing right away. Includes all the downloadable assets, over 2 hours of video instruction, a detailed PDF and exclusive access to the VOX Facebook Group.
