

THE OPENER RED by Adrian Vega - Kartentrick

"Thank you Adrian for creating this professional piece of magic and share it with our community. I used in my recent show called 'Flipar' and it was a great success"

- **Jorge Blass**

"Since I first got the trick from Adrian in 2018, I immediately put it in my show and there it has remained to this very day. I highly recommended The Opener"

- **Scott Wells**

It was in 2013 when Adrian Vega performed this "Opener" for first time with the best magicians in Spain becoming the Champion of Card Magic that year.

From that day, he performed this clever miracle all around the world "fooling" and blowing away the best magicians at FFFF, at FISM, at Magic Castle, ect...

After a funny gag, imagine making appear just ONE folded card in your fingertips. Then, the spectator thinks in one number and a suit totally free (no force) to create a unique card. The big surprise is when you open that card, and of course, it is the thought card. Just like that.

And the best part it is super easy to do, nothing to switch, nothing to hide, just enjoy the funny presentation pattern, tested during more than 10 years, being part of Adrian's professional repertoire. This is not one more advertisement hooks, we can prove it.

Since he shared **The Opener** only in his lectures from 2018, **The Opener** is practically a secret shared only between top professional magicians using it in their professional shows, as you can hear from the testimonials of Jorge Blass or Scott Wells.

We are more than sure that you will enjoy performing it, and you will blow away magicians and lay people with the profesional "Opener".

Make yourself a favor and learn it now!
